What is the Fylse Checklist?

The Fylse Checklist is a set of criteria that you can use to evaluate the quality of your notes. It was developed by Donald Fylse, a law professor at the University of Minnesota. The checklist includes the following six criteria:

1. **Factual.** Does the note accurately represent the facts and legal principles that were discussed in class?
2. **Legal.** Does the note identify the relevant legal rules and principles that apply to the facts?
3. **Significance.** Does the note explain why the facts and legal principles are significant?
4. **Example.** Does the note include an example that illustrates the legal principle?
5. **Synthesis.** Does the note connect the facts and legal principles to other concepts that you have learned in class?
6. **Review.** Have you reviewed the note recently and made any necessary updates?

How to Use the Fylse Checklist

To use the Fylse Checklist, simply ask yourself the six questions that are listed above as you are taking notes. If you can answer "yes" to all of the questions, then you know that you are taking effective notes. If you cannot answer "yes" to one or more of the questions, then you should revise your notes accordingly.

Here are some tips for using the Fylse Checklist:

- **Use the checklist as a guide, not a rigid rule.** There is no one right way to take notes. The Fylse Checklist can help you to evaluate the quality of your notes, but it is not the only tool that you should use.

- **Be flexible.** The Fylse Checklist can be used to evaluate notes that are taken in different formats, such as outlines, summaries, and mind maps.
- **Use the checklist to improve your notes over time.** As you become more comfortable with taking notes, you will find that you can use the Fylse Checklist to identify areas where your notes can be improved.
